SUMMARY

I'm a PhD candidate in Mechanical Engineering at Purdue University, working on modeling, control, optimization, and machine learning for building energy systems. My research builds practical automation for efficient, occupant- and grid-interactive buildings, focusing on predictive control and reinforcement learning. I develop and demonstrate scalable data-driven control algorithms in real buildings, and I also work on power control systems in homes and on demand flexibility in commercial buildings. My work combines rigorous methods with real-world testing to make control systems more reliable and easier to deploy at scale.

EDUCATION

Purdue University, *West Lafayette, IN* — *08/2023 – Present*
PhD in Mechanical Engineering — **GPA:** 3.9/4.0
Concentration in Computational Science and Engineering

University of British Columbia (UBC), *BC, Canada* — *05/2021 – 08/2023*
MS in Mechanical Engineering — **GPA:** 94% (4.0/4.0)
Thesis: "Mixing Gaseous Hydrogen into Natural Gas Distribution Pipelines"

University of Tabriz, *EA, Iran* — *08/2016 – 07/2020*
BS in Mechanical Engineering — **GPA:** 19.12/20 (4.0/4.0) – **Rank:** 1/155+

SELECT AWARDS AND RECOGNITION

- **ASHRAE Graduate Student Grant-in-Aid Award** — *2025*
- **Best PhD Forum Presentation Runner-up Award**, *ACM BuildSys* — *2025*
- **ACM SIGEnergy Student Travel Grant**, *ACM BuildSys* — *2025*
- **Best Paper Award**, *CSME International Congress* — *2023*
- **Best Presentation Award**, *CSME International Congress (Advanced Energy Symposium)* — *2022*
- **Graduate Research Scholarship**, *University of British Columbia* — *2022*
- **Graduate Dean's Entrance Scholarship**, *University of British Columbia* — *2021*

RESEARCH EXPERIENCE

Purdue University, Graduate Research Assistant, Kircher Research Group, *West Lafayette, IN* *08/2023–Present*

- Building supervisory control software for a live field demonstration of data-driven HVAC control in a campus building.
- Co-developed a commissioning-free linear-programming supervisory HVAC controller (CDC'26).
- Co-developed an indirect data-driven predictive control method (TPC) built on a state-space predictor (under review).
- Derived a multi-zone model of how cross-zone heat transfer inflates measured HVAC savings (ACC'26; under review).
- Co-developed active current-limiting control for home appliances that avoids panel upgrades (CISBAT'25, ACEEE'26).
- Reviewed 100+ field demonstrations of MPC and reinforcement learning for HVAC (Applied Energy 2025).

UBC, Graduate Research Assistant, FortisBC Renewable Gas project, *BC, Canada* *05/2021–08/2023*

- Ran CFD simulations of hydrogen blending into natural gas pipelines; built ideal- and real-gas mixture models in C.
- Contributed to hydrogen research in the UBC H_2Lab, established through the NSERC-funded UBC–FortisBC collaboration.
- Delivered 1 journal paper, 3 conference papers, an MS thesis, and 2 awards from the project.

INDUSTRY EXPERIENCE

Purdue Energy & Utilities, Graduate Researcher, Energy Systems, *West Lafayette, IN* *02/2026–Present*

- Leading modeling and data pipelines for a pre-cooling pilot to shift demand off-peak on a 40,320-ton chilled-water system.
- Quantified ∼$41k/yr savings and a statistically significant 8% lower approach from a two-plant air/dirt-separator retrofit.
- Delivered a nine-year energy-use assessment of 21 renovations to Purdue leadership for the Giant Leaps Master Plan.

Tesla, Inc., Applied Machine Learning Intern, Drive Unit, *Sparks, NV* *05/2025–08/2025*

- Built MySQL pipelines, engineered features, and trained ML models (XGBoost, random forests, neural nets) with R^2 0.85.
- Helped deploy a thermal imaging system for drive-unit inspection, replacing destructive laboratory testing.
- Delivered ML-driven quality gains projected to cut testing costs by over $1M/year; offered a three-month extension.

TEACHING EXPERIENCE

Purdue University, Graduate Teaching Assistant (PhD)

- ME597: Distributed Energy Resources (DERs) 🌐 *Spring'26*
  - Supported 52 students on modeling and control of DERs such as batteries, solar PV, EVs, and HVAC.
  - Assisted with homework, coding modules, and office hours covering DER concepts.
  - Guided semester projects on DER topics, including building controls and data center cooling.

University of British Columbia, Graduate Teaching Assistant (MS)

- Engineering Analysis I *Fall'21, Spring'22, Fall'22*
- Fluid Mechanics II Lab *Spring'22, Spring'23*

LEADERSHIP & MENTORSHIP

Research Mentor, Purdue University *2024–Present*

- Mentored three master's students and one undergraduate on research planning and technical writing.
- Collaborated on their research and co-authored the resulting publications.

Disability Resource Centre Invigilator, University of British Columbia *2021–2023*

- Invigilated accommodated exams, supporting students with approved testing accommodations.

ACADEMIC SERVICE

Conference and workshop organizing:

July 2026	Student Chair, Intelligent Building Operations (IBO) Workshop 🌐, *West Lafayette, IN*
July 2024	Student Chair, Intelligent Building Operations (IBO) Workshop, *West Lafayette, IN*

Society memberships: ASHRAE, ACM, IEEE, CSME

Reviewing: IEEE Transactions on Control Systems Technology; IEEE Conference on Decision and Control; Building and Environment; Journal of Building Performance Simulation; ACEEE Summer Study on Energy Efficiency in Buildings; Herrick Conferences

SELECT COURSES

- ECE570: Artificial Intelligence
- IE690: Reinforcement Learning & Control (RLC)
- AAE568: Applied Optimal Control & Estimation
- AAE 561: Intro to Convex Optimization
- STAT511: Statistical Methods
- ME597: Industrial Internet of Things (IIoT)
- ME597: Distributed Energy Resources (DERs)
- ME511: Analysis of Thermal Systems

SKILLS

Languages:	Python, MATLAB, C, SQL
Optimization & ML:	CVXPY, Gurobi, TensorFlow, PyTorch, scikit-learn, XGBoost, Stable-Baselines3
Simulation & Testbeds:	BOPTEST, Gymnasium, OCHRE
Systems & Tools:	InfluxDB, Grafana, Git, Linux, LaTeX, Docker
