SUMMARY

I'm a PhD candidate in Mechanical Engineering at Purdue University, working on predictive control and reinforcement learning for building energy systems. My work draws on machine learning, control theory, modeling and simulation, and field demonstrations in real buildings, applied to HVAC control, measurement and verification, and home electrification. I want to build a research career in scientific machine learning and control, pairing rigorous methods with real-world testing to make control systems more reliable and easier to deploy at scale.

EDUCATION

Purdue University, West Lafayette, IN PhD in Mechanical Engineering Specialization in Computational Science and Engineering	08/2023 – Present GPA: 3.9/4.0
University of British Columbia, BC, Canada MS in Mechanical Engineering Thesis: “Mixing Gaseous Hydrogen into Natural Gas Distribution Pipelines”	05/2021 – 08/2023 GPA: 94% (4.0/4.0)
University of Tabriz, EA, Iran BS in Mechanical Engineering	08/2016 – 07/2020 GPA: 19.12/20 (4.0/4.0) – Rank: 1/155+

SELECT AWARDS AND RECOGNITION

ASHRAE Graduate Student Grant-in-Aid Award	2025
Best PhD Forum Presentation Runner-up Award, ACM BuildSys	2025
Best Paper Award, CSME International Congress	2023
Best Presentation Award, CSME International Congress (Advanced Energy Symposium)	2022
UBC Graduate Scholarship, University of British Columbia	2022
UBC Dean’s Entrance Scholarship, University of British Columbia	2021

LEADERSHIP & MENTORSHIP

- Research Mentor**, Purdue University 2024–Present
– Mentored and collaborated with three master’s students and one undergraduate researcher on research planning and technical writing, co-authoring publications together.
- Disability Resource Centre Invigilator**, University of British Columbia 2021–2023
– Supported students receiving academic accommodations during examinations.

INDUSTRY EXPERIENCE

- Purdue Energy & Utilities**, Graduate Researcher, Energy Systems, *West Lafayette, IN* 02/2026–Present
– Leading data pipeline and modeling for a pilot that pre-cools buildings to shift campus cooling demand off-peak.
– Quantified chiller-plant efficiency savings (~\$41k/yr) via a weather-normalized M&V study of air/dirt separators.
– Analyzed EUI and CHW peak demand across nine fiscal years of campus renovations for E&U renovation planning.
- Tesla, Inc.**, Intern, Machine Learning for Drive Unit Quality, *Sparks, NV* 05/2025–08/2025
– Built supervised ML models (XGBoost, DNNs, SVR, and ensembles) for defect detection and quality assessment.
– Developed data pipelines in MySQL and engineered features to extract high-signal inputs for ML models.
– Helped deploy a thermal imaging system for non-destructive inspection in drive-unit manufacturing.
– Delivered ML-driven quality improvements projected to reduce testing costs by over \$1M/year.
- FortisBC**, Graduate Researcher, Renewable Gas, *Vancouver, BC* 05/2021–08/2023
– Investigated hydrogen blending into natural gas distribution systems on an NSERC-funded UBC-FortisBC project.
– Performed CFD simulations and developed ideal- and real-gas mixture models in C. 
– Contributed to hydrogen research within the UBC H₂Lab, established through this collaboration. 
– Delivered research resulting in one journal paper, three conference papers, an MS thesis, and two awards.

TEACHING EXPERIENCE

Purdue University, Graduate Teaching Assistant (PhD)

– ME597: Distributed Energy Resources (DERs)

Spring'26

- Supported 52 students on modeling and control of DERs such as batteries, solar PV, EVs, and HVAC.
- Assisted with homework, coding modules, and office hours covering DER concepts.
- Guided semester projects on DER topics, including building controls and data center cooling.

University of British Columbia, Graduate Teaching Assistant (MS)

– Engineering Analysis I

Fall'21, Spring'22, Fall'22

– Fluid Mechanics II Lab

Spring'22, Spring'23

ACADEMIC SERVICE

Conference and workshop organizing:

July 2026 | Intelligent Building Operations Workshop student chair, West Lafayette, IN

July 2024 | Intelligent Building Operations Workshop student chair, West Lafayette, IN

Society memberships: ASHRAE, ACM, IEEE, CSME

Reviewing: IEEE Transactions on Control Systems Technology; Building and Environment; IEEE Conference on Decision and Control; Herrick Conferences; ACEEE Summer Study on Energy Efficiency in Buildings

SELECTED COURSES

- | | |
|---|---|
| • ECE570: Artificial Intelligence | • STAT511: Statistical Methods |
| • IE690: Reinforcement Learning & Control (RLC) | • ME597: Industrial Internet of Things (IIoT) |
| • AAE568: Applied Optimal Control & Estimation | • ME597: Distributed Energy Resources (DERs) |
| • AAE 561: Intro to Convex Optimization | • ME511: Analysis of Thermal Systems |

SKILLS

Expertise: Predictive Control, Reinforcement Learning, Data Structures & Algorithms, Convex Optimization, Control Theory, Machine Learning, Deep Learning, Generative AI, Industrial IoT, Buildings & HVAC, Thermodynamics.

Programming & Tools: Python, MATLAB, C, Git, Linux, Docker.

ML & Optimization: PyTorch, TensorFlow, scikit-learn, XGBoost, Stable-Baselines3, CVX, CVXPY, Gurobi

Data Analysis & Visualization: Pandas, NumPy, SciPy, Matplotlib, Seaborn, Grafana.

Simulation & Testbeds: Gymnasium, OCHRE, BOPTEST.
