SUMMARY

My research addresses a central challenge of the energy transition: how to make buildings efficient and grid-responsive without controllers that are costly to build and fragile in practice. I develop predictive control and reinforcement learning methods that learn building dynamics from operating data while respecting comfort and equipment limits. I then translate these methods into field demonstrations: predictive control in occupied commercial buildings, demand flexibility for grid services, and power control systems that let homes add electric loads without panel upgrades. The broader goal of my work is building automation that scales, with efficiency and grid flexibility coming from software rather than new hardware.

EDUCATION

Purdue University, *West Lafayette, IN* — *08/2023 – Present*
PhD in Mechanical Engineering — **GPA:** 3.9/4.0
Concentration in Computational Science and Engineering

University of British Columbia (UBC), *BC, Canada* — *05/2021 – 08/2023*
MS in Mechanical Engineering — **GPA:** 94% (4.0/4.0)
Thesis: "Mixing Gaseous Hydrogen into Natural Gas Distribution Pipelines"

University of Tabriz, *EA, Iran* — *08/2016 – 07/2020*
BS in Mechanical Engineering — **GPA:** 19.12/20 (4.0/4.0) – **Rank:** 1/155+

SELECT AWARDS AND RECOGNITION

ASHRAE Graduate Student Grant-in-Aid Award *2025*
Best PhD Forum Presentation Runner-up Award, *ACM BuildSys* *2025*
ACM SIGEnergy Student Travel Grant, *ACM BuildSys* *2025*
Best Paper Award, *CSME International Congress* *2023*
Best Presentation Award, *CSME International Congress (Advanced Energy Symposium)* *2022*
Graduate Research Scholarship, *University of British Columbia* *2022*
Graduate Dean's Entrance Scholarship, *University of British Columbia* *2021*

RESEARCH EXPERIENCE

Purdue University, Graduate Research Assistant, Kircher Research Group, *West Lafayette, IN* *08/2023–Present*

- Identified a grey-box thermal model of a 13-zone campus building from BAS data for predictive pre-cooling control.
- Developed a two-parameter, tuning-free HVAC controller with **up to 87% of optimal savings** in simulation (CDC'26).
- Built data-driven predictive control with the **lowest prediction error and failure rate** of all predictors (under review).
- Derived and tested a multi-zone model showing small HVAC demos **overstate savings** (ACC'26, under review).
- Developed current-limiting control for home appliances to **avoid $2k–$10k panel upgrades** (CISBAT'25, ACEEE'26).
- Led a review of **100+** field demonstrations of MPC and RL for HVAC (Applied Energy).

UBC, Graduate Research Assistant, TMMF Lab & FortisBC Renewable Gas, *BC, Canada* *05/2021–08/2023*

- Ran CFD simulations of hydrogen blending into natural gas pipelines; built ideal- and real-gas mixture models in C.
- Delivered **1** journal paper, **3** conference papers, an MS thesis, and **2** awards on a project that seeded the UBC H_2Lab.

INDUSTRY EXPERIENCE

Tesla, Inc., Applied ML Intern, *Sparks, NV* *05/2025–08/2025*

– Built MySQL pipelines, engineered features, and trained ML models (XGBoost, random forests, neural nets) to $\mathbf{R^2}$ **0.85**.
– Helped deploy a thermal imaging system for drive-unit inspection, replacing destructive laboratory testing.
– Delivered ML-driven quality gains projected to cut testing costs by over **$1M/year**; offered a **three-month extension**.

Purdue Energy & Utilities, Energy Systems Researcher, *West Lafayette, IN* *02/2026–Present*
– Designed and ran a **three-day pre-cooling trial** in a 13-zone campus building to shift cooling demand off-peak.
– Delivered a nine-year energy-use assessment of 21 renovations to **Purdue leadership** for the Giant Leaps Master Plan.
– Quantified ∼**$41k/yr** savings and a statistically significant **8%** lower approach from a two-plant air/dirt-separator retrofit.

TEACHING EXPERIENCE

Purdue University, Graduate Teaching Assistant (PhD)
– ME597: Distributed Energy Resources (DERs) *Spring'26*
  – Supported 52 students on modeling and control of DERs such as batteries, solar PV, EVs, and HVAC.
  – Assisted with homework, coding modules, and office hours covering DER concepts.
  – Guided semester projects on DER topics, including building controls and data center cooling.

University of British Columbia, Graduate Teaching Assistant (MS)
– Engineering Analysis I *Fall'21, Spring'22, Fall'22*
– Fluid Mechanics II Lab *Spring'22, Spring'23*

LEADERSHIP & MENTORSHIP

Research Mentor, Purdue University *2024–Present*
– Mentored three master's students and one undergraduate on research planning and technical writing.
– Collaborated on their research and co-authored the resulting publications.

Disability Resource Centre Invigilator, University of British Columbia *2021–2023*
– Invigilated accommodated exams, supporting students with approved testing accommodations.

ACADEMIC SERVICE

Conference and workshop organizing:

July 2026	Student Chair, Intelligent Building Operations (IBO) Workshop, *West Lafayette, IN*
July 2024	Student Chair, Intelligent Building Operations (IBO) Workshop, *West Lafayette, IN*

Society memberships: ASHRAE, ACM, IEEE, CSME

Reviewing: IEEE Transactions on Control Systems Technology; IEEE Conference on Decision and Control; Building and Environment; Journal of Building Performance Simulation; ACEEE Summer Study on Energy Efficiency in Buildings; Herrick Conferences

SELECT COURSES

- ECE570: Artificial Intelligence
- IE690: Reinforcement Learning & Control (RLC)
- AAE568: Applied Optimal Control & Estimation
- AAE 561: Intro to Convex Optimization
- STAT511: Statistical Methods
- ME597: Industrial Internet of Things (IIoT)
- ME597: Distributed Energy Resources (DERs)
- ME511: Analysis of Thermal Systems

SKILLS

Languages:	Python, MATLAB, C, SQL
Optimization & ML:	CVXPY/CVX, TensorFlow, scikit-learn, XGBoost, Stable-Baselines3, PyTorch, Gurobi
Simulation & Testbeds:	BOPTEST, Gymnasium, OCHRE
Systems & Tools:	Git, InfluxDB, Grafana, MySQL, Pandas, NumPy, Linux, Docker, LaTeX
