EDUCATION

Purdue University — *PhD, Mechanical Engineering* West Lafayette, IN | 08/2023 – 08/2028
Concentration in Computational Science and Engineering | GPA 3.9/4.0
Research Interests: optimal control, reinforcement learning, data-driven control, energy systems, smart buildings
Coursework: Reinforcement Learning & Control, Applied Optimal Control & Estimation, Convex Optimization, Artificial Intelligence, Statistical Methods, Industrial Internet of Things, Distributed Energy Resources, Analysis of Thermal Systems

University of British Columbia (UBC) — *MS, Mechanical Engineering* | GPA 4.0/4.0 BC, Canada | 05/2021 – 08/2023

University of Tabriz — *BS, Mechanical Engineering* | GPA 4.0/4.0 | Ranked 1 of 155+ EA, Iran | 08/2016 – 08/2020

EXPERIENCE

Purdue University — *Graduate Research Assistant, Kircher Research Group* West Lafayette, IN | 08/2023 – Present

- Identified a grey-box thermal model of a 13-zone campus building from BAS data for predictive pre-cooling control.
- Developed a two-parameter, tuning-free HVAC controller with **up to 87% of optimal savings** in simulation (CDC'26).
- Built data-driven predictive control with the **lowest prediction error and failure rate** of all predictors (under review).
- Derived and tested a multi-zone model showing small HVAC demos **overstate savings** (ACC'26).
- Developed current-limiting control for home appliances to **avoid $2k–$10k panel upgrades** (CISBAT'25, ACEEE'26).
- Led a 4-institution review of **all known** real-world demonstrations of MPC and RL for HVAC (Applied Energy).

Tesla, Inc. — *Applied ML Intern* Sparks, NV | 05/2025 – 08/2025

- Built MySQL pipelines, engineered features, and trained ML models (XGBoost, random forests, neural nets) to **R^2 0.9**.
- Helped deploy a thermal imaging system for drive-unit inspection, replacing destructive laboratory testing.
- Delivered ML-driven quality gains projected to cut testing costs by over **$1M/year**; offered a **three-month extension**.

Google — *Open-Source Contributor, Smart Buildings Simulator (SBSim)* Remote | 12/2025 – Present

- Co-leading a benchmark of SBSim against EnergyPlus on **RL training speed** with **Google** and **Berkeley Lab**.
- Proposed the **predictive control** workstream and presented **two talks** to the Google-led working group.
- Contributed code and **reviewed pull requests** for the open-source codebase.

Purdue Energy & Utilities — *Energy Systems Researcher* West Lafayette, IN | 02/2026 – Present

- Designed and ran a **three-day pre-cooling trial** in a 13-zone campus building to shift cooling demand off-peak.
- Delivered a nine-year energy-use assessment of 21 renovations to **Purdue leadership** for the Giant Leaps Master Plan.
- Quantified **~$41k/yr** savings and a statistically significant **8%** lower approach from a two-plant air/dirt-separator retrofit.

UBC — *Graduate Research Assistant, TMMF Lab & FortisBC Renewable Gas* BC, Canada | 05/2021 – 08/2023

- Ran CFD simulations of hydrogen blending into natural gas pipelines; built ideal- and real-gas mixture models in C.
- Delivered **1** journal paper, **3** conference papers, an MS thesis, and **2** awards on a project that seeded the UBC H_2Lab.

SKILLS

Languages: Python, MATLAB, C, SQL | **Simulation & Testbeds:** BOPTEST, Gymnasium, OCHRE, EnergyPlus, Google SBSim
Optimization & ML: CVXPY/CVX, TensorFlow, scikit-learn, XGBoost, Stable-Baselines3, PyTorch, Gurobi
Systems & Tools: Git, InfluxDB, Grafana, MySQL, Pandas, NumPy, Linux, Docker, LaTeX

SELECT HONORS & AWARDS

ASHRAE Graduate Student Grant-in-Aid Award 2025 | Best PhD Forum Presentation Runner-up, ACM BuildSys 2025 | ACM SIGEnergy Student Travel Grant 2025 | Best Paper, CSME Congress 2023 | Best Presentation, CSME Congress 2022
