## SUMMARY

I'm a PhD candidate in Mechanical Engineering at Purdue University, working on modeling, control, optimization, and machine learning for building energy systems. My research builds practical automation for efficient, occupant- and grid-interactive buildings, focusing on predictive control and reinforcement learning. I develop and demonstrate scalable data-driven control algorithms in real buildings, and I also work on power control systems in homes and on demand flexibility in commercial buildings. My work combines rigorous methods with real-world testing to make control systems more reliable and easier to deploy at scale.

## EDUCATION

## TALKS

8. “Small HVAC Control Demonstrations in Larger Buildings Often Overestimate Savings.” *American Control Conference (ACC), New Orleans, LA, 2026*.
7. “Field Demonstration of Advanced Commercial HVAC Control for Scalable Deployment.” *PhD Forum, 12th ACM International Conference on Systems for Energy-Efficient Buildings, Cities, and Transportation (BuildSys), Golden, CO, 2025*.
6. “What Have We Learned From Field Demonstrations of Advanced Commercial HVAC Control?” *8th International High Performance Buildings Conference, Purdue University, West Lafayette, IN, 2024*.
5. “Field Demonstrations of Advanced Commercial HVAC Control.” *Intelligent Building Operations Workshop, Purdue University, West Lafayette, IN, 2024*.
4. “Mixing Gaseous Hydrogen into Natural Gas Distribution Pipelines.” *Herrick Graduate Seminar, Purdue University, West Lafayette, IN, 2023*.
3. “Blending of Hydrogen into a Natural Gas Distribution Pipeline in British Columbia through a Tee Junction for Reducing GHG Emissions.” *CSME International Congress, Université de Sherbrooke, QC, Canada, 2023*.
2. “Green Hydrogen Supply to Urban Infrastructure and Buildings through Blending into the Existing Grid.” *CSME International Congress, University of Alberta, AB, Canada, 2022*.
1. “The Blending and Transmission of Hydrogen and Natural Gas in Transmission and Distribution Pipelines.” *13th International Green Energy Conference (IGEC-XIII), 2021*.

## RESEARCH EXPERIENCE

**Purdue University**, Graduate Research Assistant, Kircher Research Group, *West Lafayette, IN* 08/2023–Present

- Building supervisory control software for a live field demonstration of data-driven HVAC control in a campus building.
- Co-developed a commissioning-free linear-programming supervisory HVAC controller (CDC’26).
- Co-developed an indirect data-driven predictive control method (TPC) built on a state-space predictor (under review).
- Derived a multi-zone model of how cross-zone heat transfer inflates measured HVAC savings (ACC’26; under review).
- Co-developed active current-limiting control for home appliances that avoids panel upgrades (CISBAT’25, ACEEE’26).
- Reviewed 100+ field demonstrations of MPC and reinforcement learning for HVAC (Applied Energy 2025).

**UBC**, Graduate Research Assistant, FortisBC Renewable Gas project, *BC, Canada* 05/2021–08/2023

- Ran CFD simulations of hydrogen blending into natural gas pipelines; built ideal- and real-gas mixture models in C. 
- Delivered 1 journal paper, 3 conference papers, an MS thesis, and 2 awards on a project that seeded the UBC H<sub>2</sub>Lab. 

## INDUSTRY EXPERIENCE

**Purdue Energy & Utilities**, Graduate Researcher, Energy Systems, *West Lafayette, IN* 02/2026–Present

- Leading modeling and data pipelines for a pre-cooling pilot to shift demand off-peak on a 40,320-ton chilled-water system.

- Quantified ~\$41k/yr savings and a statistically significant 8% lower approach from a two-plant air/dirt-separator retrofit.
- Delivered a nine-year energy-use assessment of 21 renovations to Purdue leadership for the Giant Leaps Master Plan.

**Tesla, Inc.**, Applied Machine Learning Intern, Drive Unit, *Sparks, NV*

*05/2025–08/2025*

- Built MySQL pipelines, engineered features, and trained ML models (XGBoost, random forests, neural nets) with  $R^2$  0.85.
- Helped deploy a thermal imaging system for drive-unit inspection, replacing destructive laboratory testing.
- Delivered ML-driven quality gains projected to cut testing costs by over \$1M/year; offered a three-month extension.

## TEACHING EXPERIENCE

---

**Purdue University**, Graduate Teaching Assistant (PhD)

- ME597: Distributed Energy Resources (DERs)  *Spring'26*
  - Supported 52 students on modeling and control of DERs such as batteries, solar PV, EVs, and HVAC.
  - Assisted with homework, coding modules, and office hours covering DER concepts.
  - Guided semester projects on DER topics, including building controls and data center cooling.

**University of British Columbia**, Graduate Teaching Assistant (MS)

- Engineering Analysis I *Fall'21, Spring'22, Fall'22*
- Fluid Mechanics II Lab *Spring'22, Spring'23*

## LEADERSHIP & MENTORSHIP

---

**Research Mentor**, Purdue University

*2024–Present*

- Mentored three master's students and one undergraduate on research planning and technical writing.
- Collaborated on their research and co-authored the resulting publications.

**Disability Resource Centre Invigilator**, University of British Columbia

*2021–2023*

- Invigilated accommodated exams, supporting students with approved testing accommodations.

## ACADEMIC SERVICE
